## Chapter 1. Extension number1

### 1.1. Basic information

The extension to be validated consists of the time series from the data1 to the 87. The status of the validation is: COMPLETED.

The number of estimations needed to perform the validation was 1000.

### 1.2. Estimated parameters with their intervals

It was necessary to fix 0 parameters of 11 that could be fixed to complete validation.

Due to a deviation from the median the CSB method was activated to obtain the parameter intervals.

## Chapter 6. Extension number6

### 6.1. Basic information

The extension to be validated consists of the time series from the data236 to the 278. The status of the validation is: COMPLETED.

The number of estimations needed to perform the validation was1000.

### 6.2. Estimated parameters with their intervals

It was necessary to fix 0 parameters of 10 that could be fixed to complete validation.

Due to a deviation from the median the CSB method was activated to obtain the parameter intervals.

## Chapter 13. Extension number13

### 13.1. Basic information

The extension to be validated consists of the time series from the data394 to the 403. The status of the validation is: COMPLETED.

The number of estimations needed to perform the validation was1000.

### 13.2. Estimated parameters with their intervals

It was necessary to fix 0 parameters of 10 that could be fixed to complete validation.

## Chapter 20. Extension number20

### 20.1. Basic information

The extension to be validated consists of the time series from the data463 to the 463. The status of the validation is: COMPLETED.

The number of estimations needed to perform the validation was1000.

### 20.2. Estimated parameters with their intervals

It was necessary to fix 0 parameters of 10 that could be fixed to complete validation.

Due to a deviation from the median the CSB method was activated to obtain the parameter intervals.

The number of estimations needed to perform the validation was1000.

### 27.2. Estimated parameters with their intervals

It was necessary to fix 0 parameters of 10 that could be fixed to complete validation.

## Chapter 28. Extension number28

### 28.1. Basic information

The extension to be validated consists of the time series from the data549 to the 558. The status of the validation is: COMPLETED.

The number of estimations needed to perform the validation was1000.

### 28.2. Estimated parameters with their intervals

It was necessary to fix 0 parameters of 10 that could be fixed to complete validation.

## Chapter 29. Extension number29

### 29.1. Basic information

The extension to be validated consists of the time series from the data558 to the 661. The status of the validation is: COMPLETED.

The number of estimations needed to perform the validation was1000.

### 29.2. Estimated parameters with their intervals

It was necessary to fix 0 parameters of 10 that could be fixed to complete validation.

Due to a deviation from the median the CSB method was activated to obtain the parameter intervals.
